

# REGIONAL ENERGY

BUSINESS SUMMARY

## **OUR MISSION**

**We combine photovoltaic with utility grade storage systems**  
- deliver affordable energy to our customers

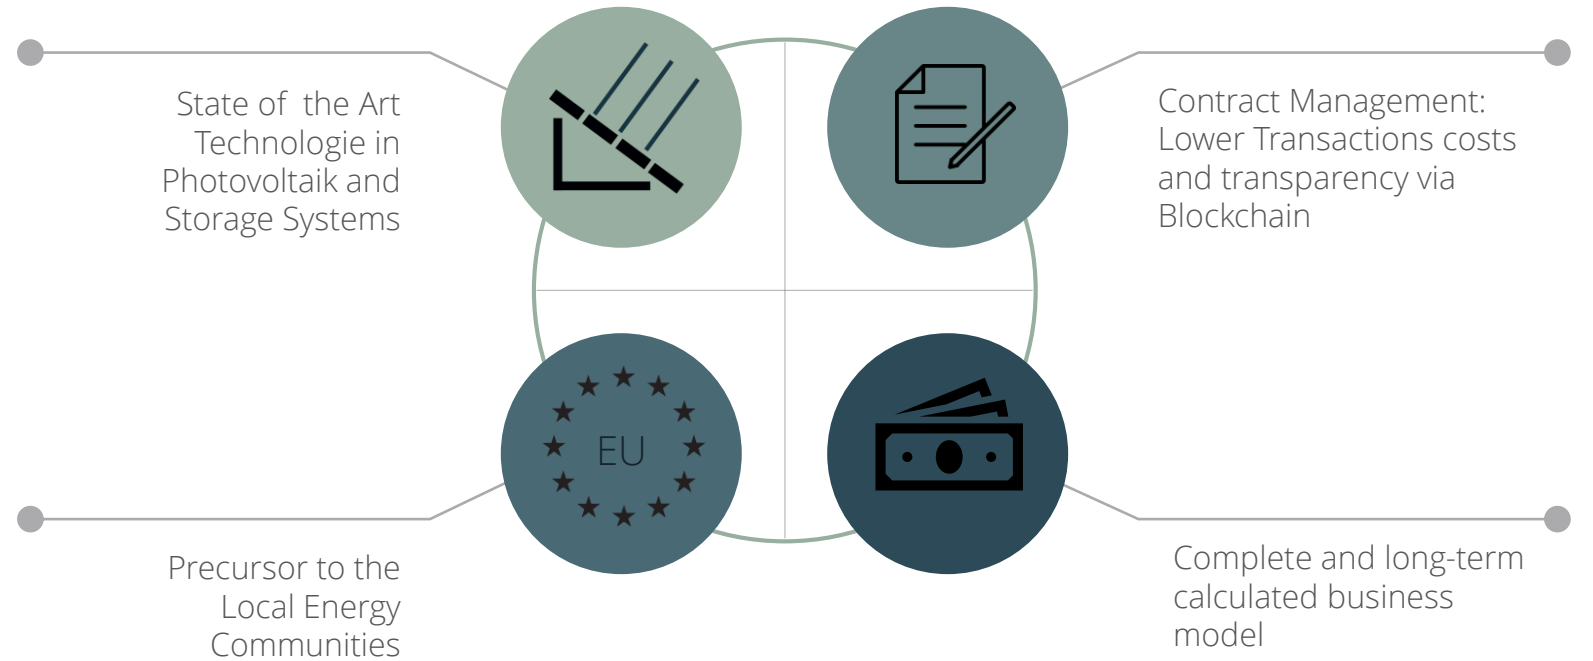

**Regional production and storage**  
- for speed in energy transition

**Europe wide first mover for Local Energy Communities**  
- target to become market leader

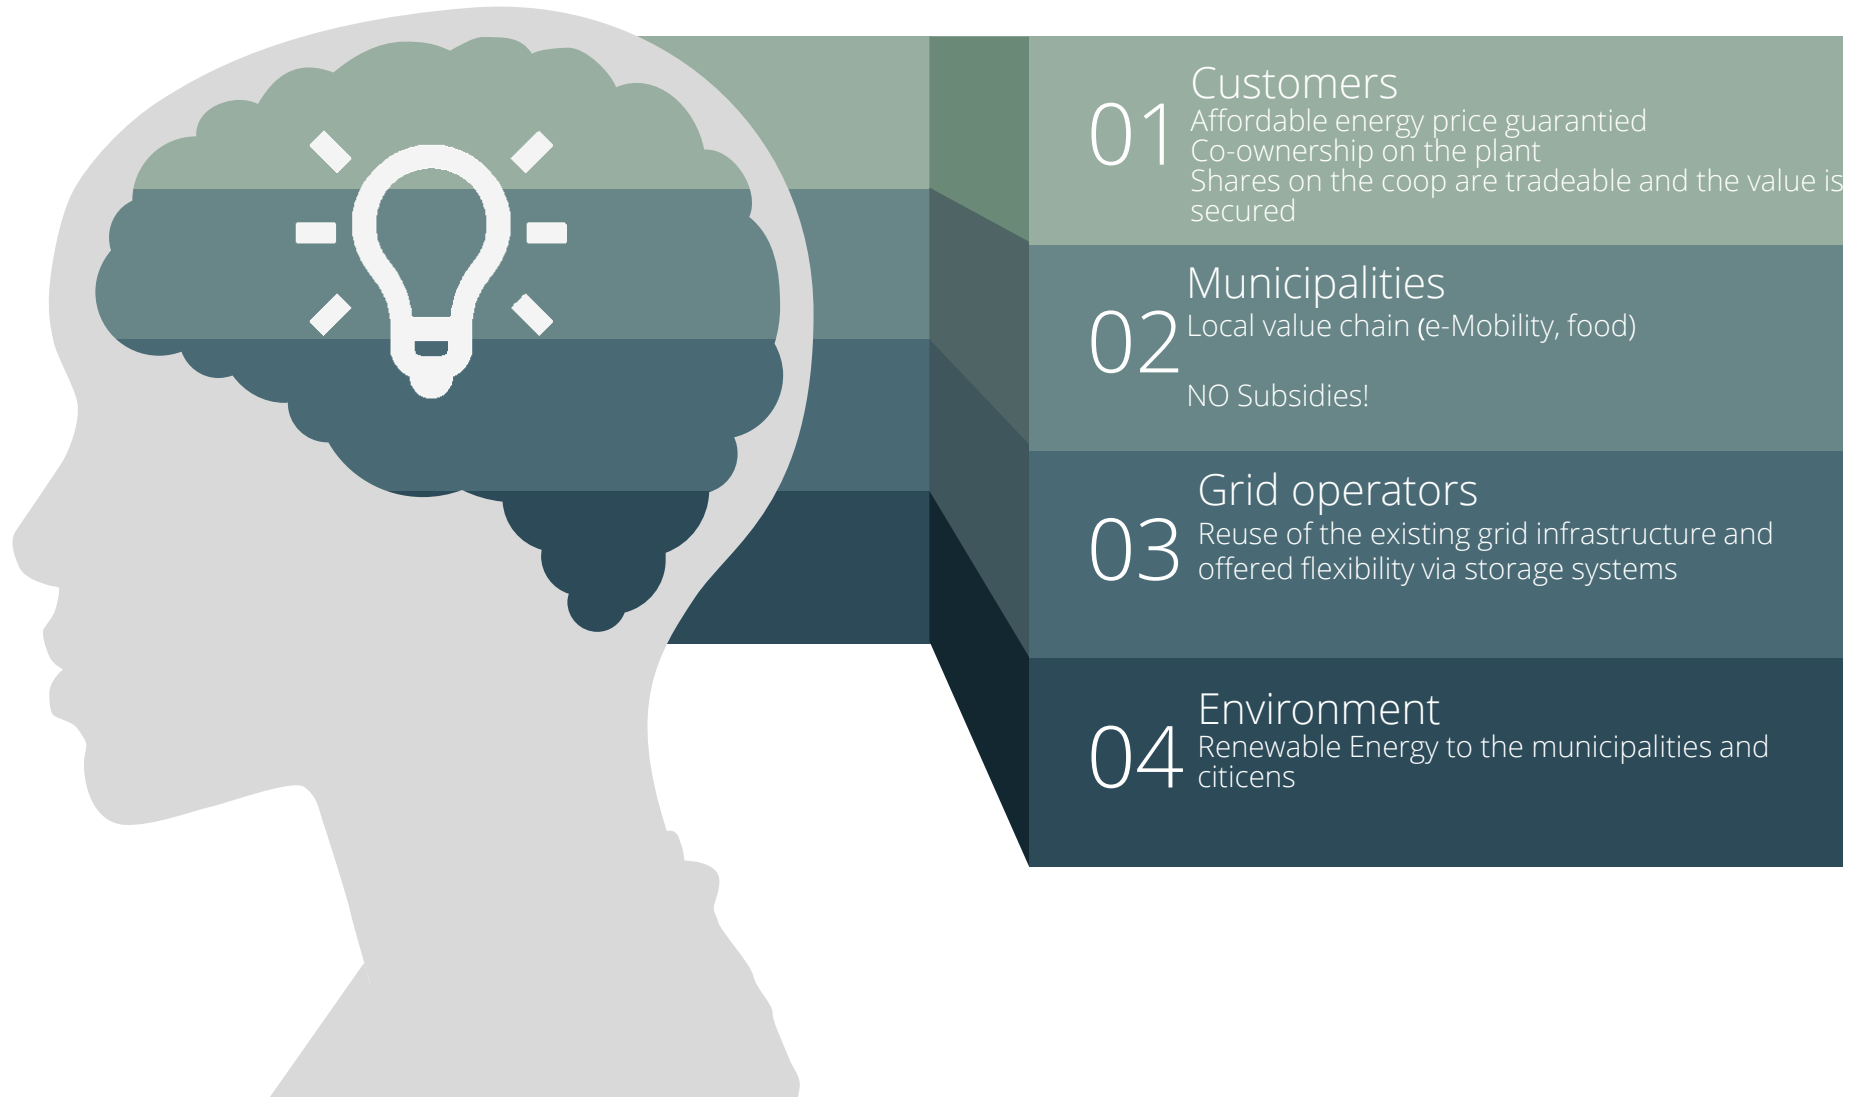

# How We Do It

## Regional Energy

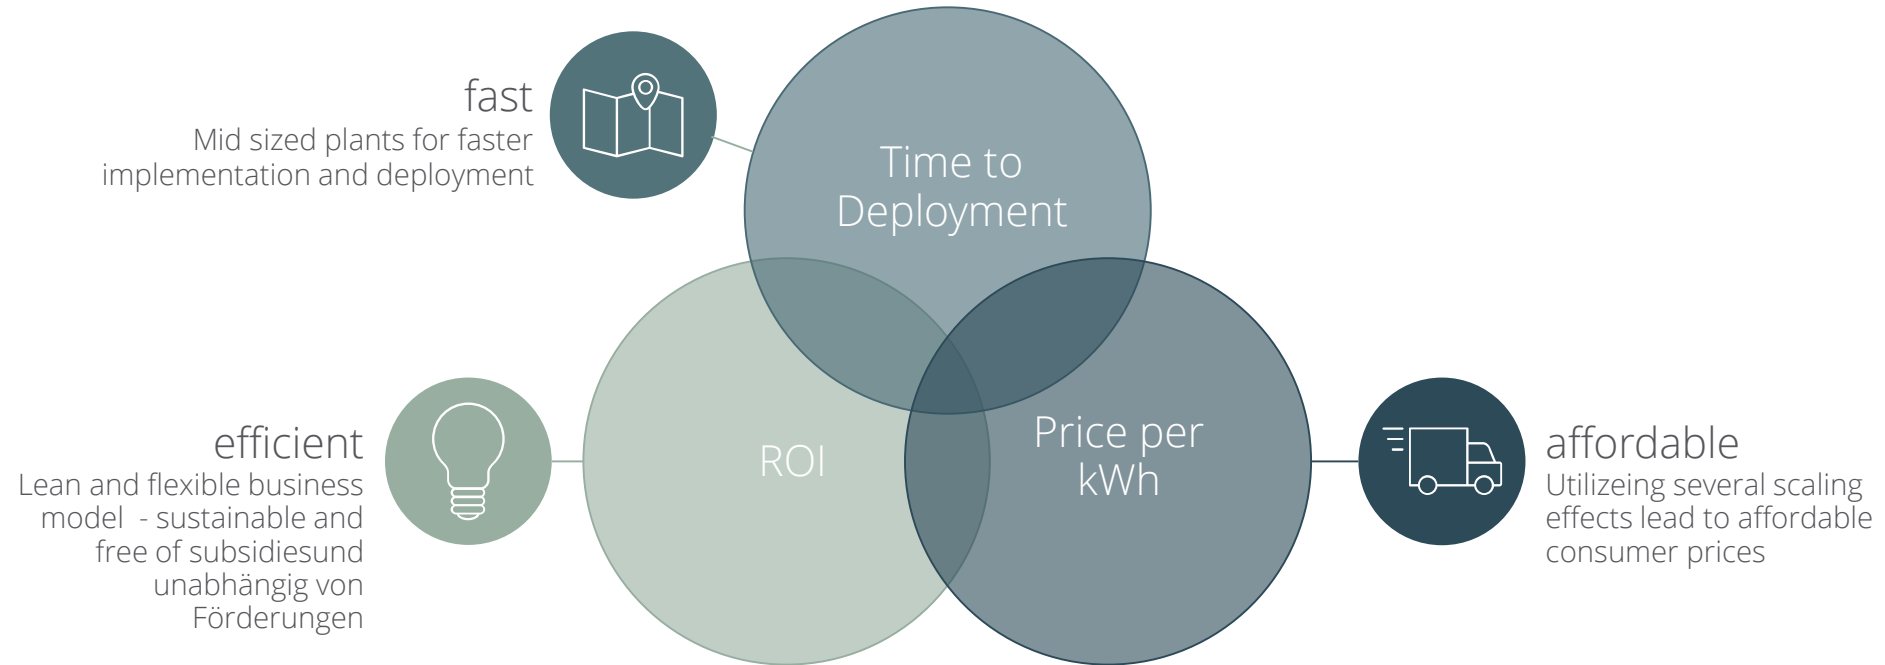

- founds „Local Energy Communities“ (Local Energy – Cooperatives)
- Implement photovoltaic-plants combined with storage systems
- Provide resources (Financing, Solar Panels, Installation),
- Is the full-service partner for the cooperatives (owner of the plant)
- Extend the plants to Sector-coupling (e-Mobility, food, etc...)

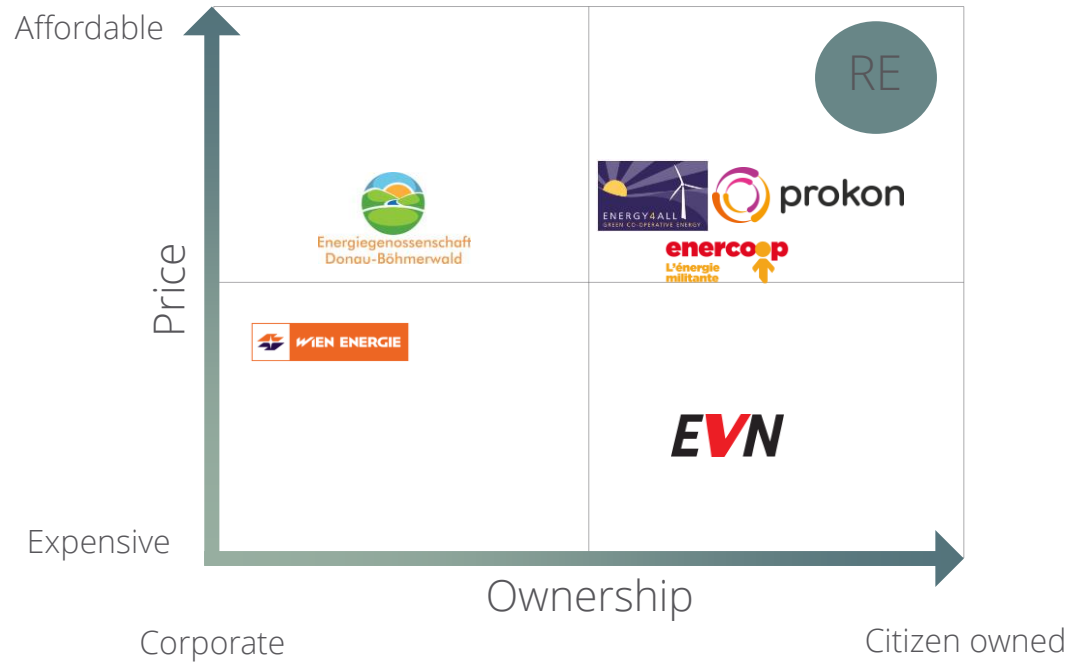

# Regional Energy - Advantages

# Efficient – fast- affordable

# Competitive Landscape

## Regional Energy

- ✗ Using existing standard technology – no R&D
- ✗ conservative Business-Model
- ✗ Acting like a industry company
- ✗ flexible and faster than the incumbent's (Energy Utilities)
